

## Top quality offshore facility

### ALL KINDS OF OPERATIONS

A wide variety of activities can be carried out at the facility:

- Maintenance, repairs and conversions of offshore units and equipment
- Removal or replacement of thrusters
- Loading and unloading heavy cargo (such as platforms) onto and from semi-submersible vessels
- Underwater inspections
- Testing cranes and hoisting equipment.

An important additional advantage is the possibility to combine use of the new offshore facility with activities at Rotterdam shipyards in the near vicinity. The offshore facility can also be used for ship-to-ship transfers and as lay-by berth.

### ADDITION TO ROTTERDAM SERVICE PORT

The new offshore facility forms an important addition to the services provided by Rotterdam as a Service Port. The many companies active in this state-of-the-art cluster of maritime industry all offer high-quality services. Not only for the offshore activities at the North Sea, but also global projects which profit from the quality of the Dutch offshore cluster. Knowledge, skills and well trained personnel are combined with great dedication to create an optimal result.

### RESERVATIONS

The offshore facility Calandkanaal is a multi-user facility and can be reserved via the Port of Rotterdam Authority. Tariffs are available on request.

### PORT OF ROTTERDAM AUTHORITY

The aim of the Port of Rotterdam Authority is to enhance the port of Rotterdam's competitive position as a logistics hub and world-class industrial complex. Not only in terms of size, but also quality. The core tasks of the Port Authority are to develop, manage and run the port in a sustainable way and to maintain a speedy and safe service for shipping.

# Top quality offshore facility

The port of Rotterdam provides a new, sheltered, spacious offshore facility in deep water. It is possible to perform various types of operations safely and efficiently in a sheltered environment. The offshore facility is now operational and can be reserved via the Port of Rotterdam Authority.

The new offshore facility is situated in the almost 23 metres deep Calandkanaal, which is part of the port's Europoort area. There is excellent access to this location from the North Sea, Rotterdam has no locks.

#### WELL-SHELTERED LOCATION

The offshore facility in the Calandkanaal provides a berth for offshore units measuring a maximum 100 x 385 metres. Vessels and platforms can be moored safely, thanks to the fender and mooring dolphins. The well-sheltered location ensures that work can also continue under less favourable weather conditions in a risk-free, environment-friendly and safe manner. Furthermore, the Calandkanaal has clear water, ideal for underwater operations and inspections.

#### SPECIFICATIONS OFFSHORE FACILITY CALANDKANAAL

Type of berth:	dolphins
Location:	Calandkanaal
Depth berth:	23,65 m – NAP
Max loa:	380 meters
Min loa:	170 meters
Max beam:	100 meters
Remark:	Also available for STS operations

Under Keel Clearance policy, density, speed restrictions, tugs, facilities, etc. see Port Information Guide: [www.portofrotterdam.com](http://www.portofrotterdam.com)
